

AMBER AHMED

I have studied medicine, engineering and data science. I have worked in diverse set of industries. I believe that one way of finding efficient and long lasting solutions to existing problems is by harnessing the power of data. I have spearheaded data visualization and automation projects that have been critical in identifying process mismatch, reducing engineering time and associated labor costs.

Currently searching for a position that allows me to build data-driven solutions leveraging a combination of process engineering and data science to help create robust chemical manufacturing processes.

EDUCATION

- 2021
|
2020
- **Introduction to Machine Learning with Tensorflow Nanodegree**
Online 📍 Udacity
 - Studied machine learning methods for supervised learning, deep learning and unsupervised learning using pandas, numpy, scikit learn, keras and tensorflow.
 - Supervised learning¹, deep learning² and unsupervised learning project.³
- 2020
|
2020
- **Programming for Data Science with R Nanodegree**
Online 📍 Udacity
 - Studied SQL for data analysis, programming with R, command line essentials and git bash
 - R programming project can be accessed here⁴
- 2015
|
2010
- **B.S.E Chemical Engineering**
Arizona State University 📍 Tempe, AZ
 - GPA 3.34
- 2008
|
2005
- **M.B;B.S.**
King Edward Medical University 📍 Lahore, Pakistan
 - Studied human anatomy, physiology and biochemistry. Passed first professional (part 1&2) in first division.

RESEARCH EXPERIENCE

- 2012
|
2010
- **Undergraduate Researcher**
Gallitano Lab 📍 University of Arizona College of Medicine
 - Analyses of genetic data from schizophrenic patients using genomic association software PLINK, PBAT and FBAT.
 - Publication⁵

LANGUAGE SKILLS

Made with the R package
[pagedown](#) and [datadrivencv](#).

The source code is available on
github.com/amberhabib/cv.

Last updated on 2021-03-11.

PUBLICATIONS

2016

● **EGR3 and ARC association to schizophrenia⁶**

PLoS One

- Performed hypothesis testing for various population datasets which served as the basis of this publication by exhibiting a strong correlation between EGR 3 and schizophrenia risk.

INDUSTRY EXPERIENCE

2018

|
2017

● **Engineer II**

Illumina Inc.

📍 San Diego, CA

- Led process inventory, and resource management as well as, planning and scheduling for proto part assembly during the critical design verification test phase for iSeq100 consumable cartridge. Served as a liaison between the product development and NPI teams.
- Constructed html dashboard for continuous reporting of proto process quality metrics (line yield, process yield, failure pareto etc.). Automated control charts for 40 critical parameters reported by 11 process and QC (quality control) tools with JSL and R scripts.
- Completed two week long offsite training for programming liquid handling robotic systems.

2017

|
2016

● **Process Engineer**

Intel Corporation

📍 Chandler, AZ

- Owned and lead the stability, performance, and improvement functions of highly advanced photolithography equipment which provides operational support to Intel's 10nm and 14nm chip manufacturing processes.
- Recognized for leading an effort to analyze and explain low parametric matching scores as a function of inherent variability in the equipment. Used IP database script and SQL database query for data extraction and JMP for data manipulation and analyses.
- Recognized for automating process control system daily report for module morning pass down saving more than 100 hr./year of indirect labor cost.

2015

|
2015

● **Research and Development Intern**

Henkel Consumer goods

📍 Scottsdale, AZ

- Design of experiment (DOE) using mixture design for improving performance of a laundry detergent formulation.

2012

|
2012

● **Process Engineering Intern**

ch2m hill

📍 Tempe, AZ

- Worked on a client project that involved detailed design, programming and support during construction for building a semiconductor fabrication plant for a client.

I have worked as a process engineer in high volume manufacturing as well as R&D. I have created a process analytics dashboard for a process with more than 40 critical parameters. I have led a team of technicians on R&D process manufacturing floor while serving as the liaison for cross functional team collaboration. I have completed training in process design for six sigma and robotic process automation. I perform best in a collaborative work environment.

DATA SCIENCE WRITING

2021

From Engineering to Data Science⁹

- Used Python for analyzing data from Kaggle 2020 Data Science and Machine Learning survey. The goal of the notebook was to highlight the tools and methods used by survey responders in engineering jobs.

2020

Bikeshare data analysis¹⁰

- Used R to create summary and visuals showing popular travel times, trip duration and user stats for the data provided by Udacity.

I have recently started writing about engineering and statistics on my website⁷ and Kaggle⁸
